

Emport LLC

More safe food, more happy people.

Choosing the right test kits can be overwhelming;
our team is here to help. Let us guide you to the tests,
tools, and services that fit your needs.

We know it is important for you to deliver consistent, safe products – your company's reputation and your customers' health depend on it. And for over a decade, we've been here to ensure your access to the best food safety solutions on the market.

While gluten and allergen management is our longtime speciality, it isn't our only area of expertise! Emport LLC carries products to help you check incoming ingredients, finished product and surfaces for a variety of concerns. Processing can be validated at any point to ensure that your final product is within guidelines for ingredient labeling.

CHECK incoming ingredients and finished goods for traces of cross-contact.

VALIDATE your QA protocols for SQF/HARPC/FSMA compliance.

VERIFY day to day facility cleanliness between production runs.

DELIVER products with the high standards your customers expect.

Our catalogue is always growing. Contact us for:
